

JIBIN JOSE

Full Stack Software Engineer | Full Stack Developer | Backend Developer

Vazhakulam, Kerala, India | +91-7994279661 | jibinjose884@gmail.com

[Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

- Results-driven Full Stack Software Engineer / Full Stack Developer with 1+ year of experience designing, developing, and deploying scalable web and mobile applications.
- Experienced in frontend and backend development using React.js, Next.js, NestJS, Node.js, TypeScript, and PostgreSQL.
- Built and delivered production-grade platforms including a sports analytics system, a government service portal, and e-commerce applications serving multiple business workflows.
- Skilled in RESTful API development, microservices architecture, JWT/RBAC authentication, AWS cloud infrastructure, CI/CD pipelines, and performance optimization.
- Strong collaborator in agile remote and onsite teams with focus on clean architecture, scalability, and high-performance systems.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, C++, Java, PHP

Frontend: React.js, Next.js, React Native, HTML5, CSS3, Tailwind CSS

Backend: Node.js, NestJS, Express.js, Laravel, REST APIs, JWT Authentication, RBAC, Microservices

Databases: PostgreSQL, MySQL, MongoDB, SQLite, Prisma ORM

Cloud & DevOps: AWS (EC2, S3, RDS), CI/CD Pipelines, GitHub Actions, Vercel, Render

Tools: Git, GitHub, Postman, Figma, Android Studio, Agile/Scrum

Specialities: System Design, Scalable Architecture, Performance Optimization, RESTful API Design

PROFESSIONAL EXPERIENCE

Software Engineer — *Abhram Technologies (Onsite)*

Nov 2025 – May 2026

- Architected and delivered a production-grade cross-platform solution — comprising a web application and a tablet app — using React Native, Next.js, and NestJS for a client account.
- Designed and maintained 10+ secure RESTful APIs using NestJS, Prisma ORM, and PostgreSQL for authentication, business logic, and CRUD operations.
- Enforced application security via JWT authentication and RBAC, ensuring route-level protection across all user roles.
- Provisioned and managed AWS infrastructure (EC2, S3, RDS), improving deployment reliability and application availability for production systems.
- Built offline-sync data pipelines using SQLite and AsyncStorage for reliability in low-connectivity environments.

Junior Software Developer Trainee — *MDigitz (Onsite)*

Jul 2026 – Oct 2026

- Developed and maintained dynamic web applications using Laravel MVC and RESTful API patterns; contributed to live client projects from day one.
- Built Belmontie Furniture E-Commerce — responsive product listings, category filters, and inquiry forms using Laravel, PHP, and MySQL.
- Engineered FIG User Directory Platform — multi-user service directory with authentication, advanced search/filter, full CRUD, and admin panel.
- Collaborated with senior engineers on database schema design, deployment workflows, and Git-based version control.

Full Stack Development Intern — *Edu-versity (Remote)*

Mar 2024 – Jun 2024

- Developed and shipped 3+ full-stack features using MERN stack within an agile, remote engineering team.
- Implemented real-time UI updates via asynchronous data flows; participated in code reviews and sprint retrospectives.

KEY PROJECTS

H10 – Sports Analytics Platform *Next.js · NestJS · TypeScript · PostgreSQL · Prisma · AWS · Razorpay*

- Architected a full-stack sports analytics platform with real-time athlete dashboards, multi-tenant club management, and role-based access for Super Admins, Club Admins, Coaches, and Athletes.
- Enabled secure management of 100+ athlete performance records with scalable PostgreSQL architecture and multi-tenant data isolation.
- Reduced report generation time by 60% through automated PDF/Excel export workflows (PDFKit, ExcelJS); deployed via GitHub Actions CI/CD on AWS EC2 and RDS.

SolidServe – Akshaya Centre Management System *Next.js · TypeScript · PostgreSQL · Prisma*

- Delivered full-stack CRUD portal for Kerala's government Akshaya service centres with dual-role dashboards, invoice generation, digital wallet management, and real-time transaction monitoring.
- Designed scalable PostgreSQL schema supporting high-volume daily transactions with Prisma ORM for type-safe database access.

Outbreak – First-Person Shooter Game *Unreal Engine 5 · C++ · System Design*

- Developed a 3D FPS game implementing player movement, collision detection, enemy AI behaviour systems, and environment interaction using Unreal Engine 5 and C++.

EDUCATION

B.Tech – Computer Science & Engineering | 2021 – 2025

University College of Engineering, Thodupuzha, Kerala

Higher Secondary – Science Stream | 2019 – 2021

SAHSS Kalloorkad, Ernakulam, Kerala

CERTIFICATIONS

- The MERN Fullstack Guide – Udemy (Jun 2024): React.js, Node.js, Express.js, MongoDB, REST APIs, Deployment
- Python Mentorship Program – IEEE (Aug 2023): Python, Algorithmic Thinking, Data Structures, Problem Solving

LEADERSHIP & ACTIVITIES

- NSS Volunteer – Coordinated community service programmes in health, education, and environmental awareness; developed team leadership and communication skills.
- Tech Fest Programme Coordinator – Managed scheduling, logistics, and participant coordination for EDUINO at University College of Engineering.

LANGUAGES

English (Fluent) · Malayalam (Native) · Hindi (Conversational)
